# Rady Haggag

## Flutter Developer

Cairo, Egypt · Open to Relocation · Military Service Completed

+201030096242 · radydev5@gmail.com · linkedin.com/in/radyhaggag · github.com/radyhaggag

## PROFILE SUMMARY

Flutter Developer with 2+ years of experience building production iOS, Android, and Web apps. Expertise in Clean Architecture, Bloc/Cubit, CI/CD automation, and performance optimization. Built real-time systems, native integrations, and scalable backend services using Node.js and Firebase.

## WORK EXPERIENCE

**Flutter Developer** · Taaly — Netherlands · Remote | December 2023 – April 2025

- Refactored the codebase to **Clean Architecture** and migrated state management from Riverpod to Bloc, reducing production bugs by 25%.
- Automated **CI/CD pipelines** using GitHub Actions and Fastlane, cutting deployment time by 40%.
- Optimized memory usage by 30% through improved image handling and **lazy loading** strategies.
- Reduced API latency and costs by 35% using **pagination** and local caching.
- Extended **Node.js** and **Firebase Cloud Functions** backend with new features and production bug fixes.
- Built and scaled **real-time video calling** using the **Agora SDK**, covering in-chat calls and full call lifecycle management.
- Led **VoIP push notification** integration for iOS using a customized CallKit package, delivering full-screen caller UI.
- Implemented end-to-end UI testing using **Patrol** and **Firebase Test Lab** across Android and iOS.
- Built native **Swift and Kotlin** integrations via platform channels to extend Flutter with platform-specific features.

**Flutter Developer** · DATAI — South Africa · Remote | April 2023 – December 2023

- Delivered features for a large-scale Flutter web platform supporting operational business workflows.
- Structured modular screens and controllers using **GetX** for state management, DI, routing, and role-based navigation.
- Integrated **REST APIs** using Dio with token-aware requests, centralized error handling, and reusable service layers.
- Developed responsive layouts with pagination, messaging, notifications, and **PDF reporting** for operational workflows.

## PROJECTS

### Salat Aljanaza App (Freelance) · 10K+ downloads on Google Play

- Introduced **geolocation-based filtering** to surface nearby janazah events within a 5 km radius.
- Integrated **Mapbox** for map rendering, place search, and location selection during event creation.
- Utilized **Firebase** for authentication, Firestore data management, and FCM push notifications.
- Created **admin tools** for activity tracking, role management, and content moderation.

**Tech:** Flutter, Bloc/Cubit, Firebase, Mapbox, Geolocation, FCM

### Live Score App · 82 stars · 43 forks on GitHub

- Architected feature-based modules using **clean architecture** and the repository pattern.
- Adopted **Cubit** state management with selective rebuilds and real-time match refreshes.
- Designed a networking layer using **Dio** with interceptors and connectivity-aware error handling.
- Delivered **end-to-end** match flows for fixtures, events, lineups, and standings.

**Tech:** Flutter, Bloc/Cubit, Dio, GetIt, GoRouter, REST APIs

### Social Media App

- Structured **modular social features**, including a feed, stories, reels, chat, search, and profile sections, using Bloc/Cubit.
- Integrated **Firebase** for auth, Firestore, media storage, and FCM token management.
- Constructed **media workflows** for uploading images and videos across posts, reels, stories, and chat.
- Implemented a **product discovery module** using web scraping and HTML parsing.

**Tech:** Flutter, Bloc/Cubit, Firebase, Hive, Web Scraping, HTML Parsing

## SKILLS

**Mobile Development:** Flutter, Dart, Bloc/Cubit, Riverpod, GetX, Flutter Web
**Backend & Integration:** Firebase, Supabase, Node.js, Cloud Functions, REST APIs, FCM
**Architecture & Quality:** Clean Architecture, SOLID, Object-Oriented Programming (OOP), Design Patterns, Unit Testing, Integration Testing, UI Testing, Performance Optimization
**Native:** Swift, Kotlin (Platform Channels), Jetpack Compose (Learning), SwiftUI (Learning)
**Tools & DevOps:** Git, GitHub, CI/CD (GitHub Actions, Fastlane, Codemagic), Firebase Test Lab, Flutter DevTools, App Store & Play Store Deployment

## EDUCATION

**Bachelor of Computer Science** 2020 – 2024
Faculty of Computers & Artificial Intelligence, Beni Suef University · GPA: 3.18 / 4.0

## LANGUAGES

**Arabic** - Native
**English** - Professional Working Proficiency
