Rady Haggag

Flutter Developer

Egypt | Open to Relocation | +20 103 009 6242 | radydev5@gmail.com | LinkedIn | GitHub

PROFILE SUMMARY

Flutter Developer with 2+ years of production experience building cross-platform iOS, Android, and Web applications. Brings end-to-end ownership across the full mobile stack — from Clean Architecture and state management to backend contributions in Node.js and Firebase Cloud Functions.

WORK EXPERIENCE

Flutter Developer, Taaly Netherlands · Remote | 12/2023 – 03/2025

- Refactored core architecture by migrating from Riverpod to Bloc/Cubit and adopting Clean Architecture, reducing production bugs by 25%.
- Automated CI/CD pipelines using GitHub Actions and Fastlane, cutting manual deployment time by 40%.
- Optimized memory consumption by 30% through advanced image handling and lazy loading strategies.
- Cut API latency and costs by 35% through strategic pagination and local caching.
- Contributed to the Node.js and Firebase Cloud Functions codebase, resolving urgent production bugs.
- Led the implementation of VoIP push notifications for iOS, forking and customizing a native CallKit package to support full-screen UI with caller name and avatar.
- Implemented end-to-end UI testing using Patrol, covering the full user flow across Android and iOS, with a CI pipeline built on GitHub Actions and Firebase Test Lab.

Flutter Developer, DATAI South Africa · Remote | 04/2023 – 12/2023

- Architected and shipped 20+ features for a Flutter Web platform within a 6-member cross-functional team.
- Maintained high code quality through 50+ technical code reviews and enforcement of SOLID principles.

SKILLS

Mobile: Flutter, Dart, Bloc/Cubit, Riverpod, Firebase, Supabase, REST/GraphQL, FCM, Flutter Web, Method Channels
Architecture & Code Quality: Clean Architecture, SOLID, OOP, Design Patterns, Unit & Integration Testing, Performance Optimization, Code Review
Tools & DevOps: Git, GitHub, CI/CD (GitHub Actions, Fastlane, Codemagic), Node.js, Firebase Cloud Functions, App Store & Play Store Deployment, Flutter DevTools

PROJECTS

Salat Aljanaza – Freelance Location-based app for funeral prayers
Discover nearby locations within 5 km and receive real-time notifications, built with Firebase, Mapbox, FCM, and Bloc.

Live Score
Real-time football app with live scores, standings, lineups, and match events — 82 stars and 43 forks on GitHub, built with Clean Architecture, Bloc, and REST APIs.

Social Media App
Full-featured social platform with Stories (custom backgrounds, draggable text), Reels, Shopping via Amazon scraping, real-time post analytics, and Chat — built with Clean Architecture, Firebase, and Bloc.

EDUCATION

Bachelor of Computer Science
Faculty of Computers & Artificial Intelligence, Beni Suef University 2020 – 2024

LANGUAGES

Arabic — Native English — Professional Working Proficiency
